

Name of the program: **"Blood Donation Camp"**

Date: 15-08-2021

Venue: College: PSCMR College of Engineering & Technology

Summary report

Description: Blood donation is a practice of donating healthy blood to people in need. People also tend to store blood in blood banks for future use. It is a sign of humanity which helps in uniting people of different religion, caste, and creed.

Blood is one of the essential fluid in our body, which helps the body to function smoothly. Blood Donation is an act of donating healthy blood to needy people. Due to excessive loss of blood, a person may die. Therefore, we can say that blood donation is an act of saving lives. 14th June is celebrated all over the globe as Blood Donor Day, where people all over the world, engage in spreading about this life-saving act. Many blood donation camps are held on that day, and millions of people across the globe actively participate in the program. Blood donation is beneficial in many ways, such as if a person is severely ill or has met an accident where he lost a considerable amount of blood; the donated blood comes into play, which helps the patient to recover gradually.

NSS Volunteers, Students and Faculty of PSCMR CET, Donated blood for the needy people through new city blood bank. Dr.K.Sri Rama Krishna, Principal of PSCMRCET, expressed his gratitude to the NSS unit of the college for its continuous endeavor in this regard

Date: 20-12-2021

Name of the program: **“Energy Conservation Awareness Campaign”**

Venue: Vinchipeta

Summary report

Description: Energy conservation refers to the efforts made to reduce the consumption of energy. The energy on Earth is not in unlimited supply. Furthermore, energy can take plenty of time to regenerate. This certainly makes it essential to conserve energy. Most noteworthy, energy conservation is achievable either by using energy more efficiently or by reducing the amount of service usage.

Importance of Energy Conservation

First of all, energy conservation plays an important role in saving non-renewable energy resources. Furthermore, non-renewable energy sources take many centuries to regenerate. Moreover, humans consume energy at a faster rate than it can be produced. Therefore, energy conservation would lead to the preservation of these precious non-renewable sources of energy.

Another important reason for energy conservation is environmental protection. This is because various energy sources are significantly harmful to the environment. Furthermore, the burning of fossil fuels considerably pollutes the atmosphere. Moreover, nuclear energy creates dangerous nuclear waste. Hence, energy conservation will lead to environmental protection.

Measures to Conserve Energy

Energy taxation is a good measure from the government to conserve energy. Furthermore, several countries apply energy or a carbon tax on energy users. This tax would certainly put pressure on energy users to reduce their energy consumption. Moreover, carbon tax forces energy users to shift to other energy sources that are less harmful.

NSS Volunteers, Faculty staff members of PSCMR CET and 90 students participated in ENERGY CONSERVATION AWARENESS CAMPAIGN on 20-12-2021.

Date: 21-12-2021

Name of the program: "Drawing Competitions on Energy Conservation"

Venue: Room No: 313

Summary report

Description: Energy conservation refers to the efforts made to reduce the consumption of energy. The energy on Earth is not in unlimited supply. Furthermore, energy can take plenty of time to regenerate. This certainly makes it essential to conserve energy. Most noteworthy, energy conservation is achievable either by using energy more efficiently or by reducing the amount of service usage.

Importance of Energy Conservation

First of all, energy conservation plays an important role in saving non-renewable energy resources. Furthermore, non-renewable energy sources take many centuries to regenerate. Moreover, humans consume energy at a faster rate than it can be produced. Therefore, energy conservation would lead to the preservation of these precious non-renewable sources of energy.

Another important reason for energy conservation is environmental protection. This is because various energy sources are significantly harmful to the environment. Furthermore, the burning of fossil fuels considerably pollutes the atmosphere. Moreover, nuclear energy creates dangerous nuclear waste. Hence, energy conservation will lead to environmental protection.

Poster presentation Competition was conducted under the sponsorship of AICTE (SPICES) in association with NSS & IEI Student Chapter on 21/12/2021 for which around 40 students of our college participated. Both boys and girls actively took part in the competition. The competition started at 2:30 pm in Room No:313 and ended at 3:30pm.
