## PURPOSE AND SCOPE:

In today's day and age, nearly every product within the reach of the common man is labeled 'smart' due to their capability of communication and remote control. These products not only communicate with the user, but also with other devices (irrespective of physical distance). The milieu of devices and products, which is manifesting into an omnipresent ecosystem, has popularly been dubbed the 'Internet of Things'. Product development companies these days are looking to take advantage of these trends and expand the range of services provided by their products. Increasing the user friendliness of these devices allows for a more personal user experience, which in turn increases the popularity of a product and its sales. Moreover, the fact that nearly every device can be serviced, updated, and even sold online, reduces the overall human effort required in many of the intermediate stages from development to commercialization. Therefore companies are increasingly looking for talented individuals with experience dealing with problems faced during the development of these products. Given that a large section of companies' technical resources are poured into the research and development of such products, it will be vastly more advantageous to prepare future engineers to tackle these new-wave industrial problems early on. Through the establishment of state-of-the-art facilities, **VIDHYA SANGHA TECHNOLOGIES PRIVATE LIMITED** aims to bridge the gap between the academic training provided to students and rapidly evolving industry demands. Helping the students reach out to industrial experts increases not only their skill set, but also polishes their ability to network and identify existing problems quicker.

**Subject – AICTE MoUs for Student Internships.**

Sir,

AICTE in its 49<sup>th</sup> meeting of the Council held on 14<sup>th</sup> March, 2017 approved a package of measures to be implemented by all technical institutions approved by AICTE to improve the standards of technical education and to provide competent technical manpower to the nation.

In order to improve the employability of the students by imparting required skills and making them industry ready, it has been decided by AICTE to introduce mandatory internship for students from the session 2017-18. To facilitate internships to the students, AICTE has been identifying organizations/institutes both in India & abroad and signing MoUs. As you are already informed, that AICTE signed MoU with Internshala (a platform for free internships) and NETiit. (for internship in Taiwan). Furtherance, AICTE has also signed **MoU with Engineering Council of India(ECI) on 24<sup>th</sup> May, 2017.**

ECI is engaged in standardizing various major engineering disciplines, professional practices in India and setting competency standards of practicing professionals. ECI, either directly or through its members may approach technical institutions and professional organizations and make necessary arrangements to facilitate Hands-on training and/ or arrange for “internships” to technical graduate for their Continuing Professional Development (CPD). ECI has agreed to offer a discounted fee structure to the learners graduating from AICTE approved Institutions.

The MoU signed between AICTE and ECI can be viewed on the AICTE website [www.aicte-india.org](http://www.aicte-india.org). Other MoUs being signed will be communicated to you from time to time.

The AICTE approved technical institutions are requested to adequately publicise this information on their websites so that students can apply for internship.

We hope your institution will take maximum advantage of this partnership for the benefit of students.

Regards,

Yours faithfully,
