After completion of registration the user will receive the call from the doctor as easily as possible.

Hospital Management System

It designed for maintaining the patient's medical records. Integrating all the patients records from different sector of hospitals with a unique identification. When the patient approaches the doctor in some unhealthy state, the doctor also needs to assess the patients previous medical history of any such disease. The previous medical history is not available for the doctors, so the patients need to perform the tests again. This results in wastage of money and time.

Dear Principal ,
PSCMR

Greetings from Oracle Volunteers !

Hope you are doing well. We are in unprecedented times of a lock down where safety and health takes priority. Education has been hit particularly hard by the COVID-19 pandemic. In different ways, we know educational institutions are connecting with students through collaboration technologies and holding virtual classroom interactions. Oracle Volunteering in collaboration with **ANANYA** thus bring to your students and faculty an amazing opportunity to know where future jobs lie and how to prepare for them. We request them to join us from 21 April to 23 April to observe the Girls in ICT day. There will be a lot of discussion on emerging technologies and careers in demand.

As you are aware Girls in ICT day is celebrated each year on the 4th Thursday of April. This year it falls on 23rd April. We have organized interactive sessions on zoom for students to benefit.

About the Event

International Girls in ICT Day is an initiative backed by ITU Member States in Plenipotentiary Resolution 70 (Rev. Busan, 2014) to create a global environment that empowers and encourages girls and young women to consider studies and careers in the growing field of information and communication technologies. There are a lot of job opportunities in the ICT sector and there is a need to bridge the digital skill gap. ICT companies are looking to attract and promote women because achieving greater workforce diversity is good for business. Thus an effort like this will help in overcoming the gender imbalance.

Supporting the education of women and girls in the ICTs is also in line with the United Nations Sustainable Development Goals (SDGs), in particular SDG 5, which is to achieve gender equality and empower all women and girls.

About the Institute

PSCMR College of Engineering & Technology is SKPVV Hindu High Schools Committee's latest contribution to the cause of education, this time in a new discipline Engineering & Technology. This shows the Committee's eagerness to promote education in as many different areas as possible. The Committee, a non-profit academic organization that had been managing very successfully only schools and arts & science colleges till 2008, then extended its educational service activities to technology education area, and that led to the starting that year, of Potti Sriramulu Chalavadi Mallikarjuna Rao College of Engineering & Technology, almost the first such institute within the Vijayawada city limits. The college is affiliated to JNTU (K) made a modest beginning with an intake of 240 students, 60 each in the branches of ECE, CSE, EEE and IT. MBA course was added the next year, that is, in 2008. Making steady progress, it has now on its rolls 1200 students in two sections of ECE and CSE each, and one section each in EEE and IT. In only its fourth year of functioning, the college has shown its potential for excellence in academics, as shown in the success rate of the students, and is making all out efforts to secure placement for its students. For a sound engineering education and assured post qualification career, PSCMRCET is among the best destination.

The institute is accredited by NAAC and its programmes(CSE,EEE,ECE) are accredited by National Board of Accreditation (NBA). The institute is affiliated to Jawaharlal Nehru Technological University, Kakinada (JNTUK).

About the Department

Department of Computer Science & Engineering has been established in the year 2008 with the current annual intake of 120 students. Computer Science Engineering (CSE) is one of the most sought after course in engineering. Today, Computer Science Engineers are very highly sought after as they are now developing the most complex and innovative forms of technology that we all use today.
