Judo Training: Even in this modern era, violence against girl students has become very common. So, it is very essential that girl students should practice the techniques of self-defense which empowers them to fight against crime. With this very objective, Judo training is given to our girls by our Judo trainer Ms. N. Usha Rani. All the equipment is provided for Judo training and the college has a very competent Judo girls team.

Report on gender equity promotion programmes organized by PSCMR College of engineering and technology

A Motivational talk on Gender Equity by Dr. A. Rama Devi, Professor, Freshmen Engineering Department was conducted for II B.Tech girl students on 12-09-2017. In her talk, she expressed that girls are second to none and they can create wonders if they are committed to a cause. She remarked that education is the only weapon with which girls can get empowered and rub shoulders with boys. Women empowerment leads to national development.

REPORT OF INDUSTRIAL VISIT TO RMC PLANT

The process of cement manufacturing which included the various steps involved in the process beginning from the mining and transporting of raw material to the plant. Portland cement clinker is either interground or intimately blended with specified quantities of gypsum and pozzolanic materials to produce Portland Pozzolana cement. Pozzolonas by themselves do not have cementitious properties but reacts with calcium hydroxide in the presence of moisture at normal temperature to form compounds having cementitious properties. The process of manufacturing of cement here involved is dry process. The raw material is heated up to 1500°C while calcinations occurs then clinker is formed. The concrete produced by using Portland Pozzolana cement has high ultimate strength, is more durable, resists wet cracking, thermal cracking and has a high degree of cohesion and workability in concrete and mortar.

Students with an opportunity to learn practically through interaction, working methods and understand about the practical aspects of production of cement and other activities managed by industrial sectors. The Industrial visit comprises of photographs and of several installations, and operations in the plant. It was very useful to the students, since the manufacturing and production process were clearly shown during the visit.

Outcome of event

The industrial visit has given a good exposure to the students with regard to mixing and making of cement, which is an essential requirement of construction of structures at the site.
