DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

Name of the Workshop:Introduction to Gen-AI with IBM watsonx
Date: 08-07-26 to 10-07-26

Objective: The workshop aimed to help students understand the basic concepts of Generative AI, large language models, prompt engineering, and AI-powered content generation. It also focused on providing participants with practical exposure to **IBM watsonx** and its capabilities for developing and exploring Generative AI solutions. The workshop emphasized connecting theoretical knowledge with hands-on learning and encouraged students to explore the potential of Generative AI in various domains.

Outcome: By the end of the workshop, participants gained a clear understanding of the basic principles of Generative AI and its differences from traditional Artificial Intelligence and Machine Learning approaches. They were able to explore the features and capabilities of **IBM watsonx** and perform basic Generative AI activities using hands-on tools and demonstrations.
